## PRECISION 5550

# Beauty and performance collide. Designed to Impress.

### STUNNING DESIGN

The newly designed 5550 is 6% smaller than the previous generation and is the perfect balance of performance and elegance. With an amazing 92% display to body ratio and the lightweight combination of aluminum and carbon fiber, it delivers the ultimate 15" mobile workstation platform for your creative and design applications. Boasting up to an HDR400, 4-sided InfinityEdge, 16:10 aspect ratio display, as well as diamond cut sidewalls and machined speaker grills, it is both vibrant and visually stunning.

### ADVANCED THERMAL DESIGN

Thermal technologies, some of which are Advanced, Dell patented thermal technologies, are essential to the smaller designed systems which provide more performance than the previous generation. Internal designs from dual fans and dual heat pipes to hidden exhaust venting through the hinge, keep the system running cool and quietly while tackling intensive workloads. Now, you and your workstation can be cool under pressure.

### POWERFUL PERFORMANCE

Deliver the power for maximum performance for demanding professional software with 10<sup>th</sup> Gen Intel® Core™ and Xeon®, up to 8-core processors, the performance of your NVIDIA Quadro® T2000 (4GB) graphics, 64GB of 2933MHz memory (with ECC memory options), 4TBs of storage and also 2 Type C Thunderbolt ports for super fast data transfers. You don't have to compromise performance with this small, lightweight workstation. In fact, go ahead and fuel your creative talents and look great while doing it.

### TESTED AND OPTIMIZED

Precision workstations feature Dell Optimizer for Precision which uses Artificial Intelligence software to learn how you work and adapts to your style to create a smarter, more-personal experience. The result? Improved system responsiveness, better application performance, smarter use of battery power, storage and audio optimization and more reliable network connectivity.  
All from a single console that you manage from WorkspaceOne or Dell SCCM—allowing IT staff to deploy, configure, update, and monitor Optimizer remotely. All Precision workstations are also tested and certified by leading software vendor so you can trust your software applications will run reliably and with rich functionality.
